

In-House Tooling Repair and Teflon Coating

With nearly 40 years of expertise, Inter-Tech provides fast, high-quality seal plate repair and Teflon refurbishing to keep your thermoforming equipment running at peak performance.

Damaged Plate

Sandblasted

Teflon Coated

Send us your seal plates today for expert repair and Teflon refurbishing—minimize downtime with our **fast turnaround times!**

What Does a Repair Include?

Our overhaul and refurbishing services for heating and sealing plates across a broad spectrum of packaging machinery. Our comprehensive repairs are designed to meet the needs of any packaging operation - ensuring that all work meets or exceeds OEM standards.

Our standard seal plate overhaul package includes:

- Thorough Cleaning
- Welding – as necessary
- Machining – as necessary
- Teflon™ coating with fast turnaround
- Installation of new heating elements – includes thermocouple and wiring
- All Repairs are bench-tested before shipping

Old Heaters? We Assemble and Bend New Heaters

As part of refurbishing sealing plates for Multivac™ equipment, we include the installation of new heating elements. Are you looking for replacement heaters? Scan our QR code to visit our on line store.
